

Anchoring options

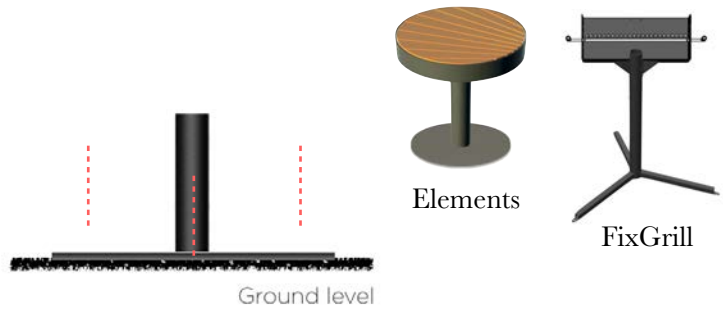

A. Ground bracket Concrete

Concrete foundation to dig down in soft ground. It's easy to mount since it's delivered with a smart locking device which also prevent theft.

B. Ground bracket Terrace foot

A terrace foot with the option to bolt in the ground.

C. Ground bracket shallow ground

For shallow grounds (approx. 30cm), such as court yards with garage underneath.

D. Ground bracket Casting

To be used when casting is the preferred option.

E. Ground bracket bolt

To be used on hard ground/surface. The screws need to withstand great forces why they need a careful installation.
